

Black Gold Emergency Planners Inc. (Black Gold) is a leading Oil & Gas consulting company specializing in emergency preparedness. The Company develops Emergency Response Plans for upstream oil and gas producers with assets in the Western Canadian Sedimentary Basin.

EDUCATION AND EXPERIENCE

Black Gold is seeking an experienced or Senior Emergency Response Planner who is a motivated professional who is eager to join an exciting company with excellent growth potential. This individual must have a petroleum engineering degree or an equivalent technical diploma. There is also a requirement for petroleum land knowledge, ICS certification, as well as a high level of expertise in dealing with sour gas operations. This highly organized individual must have good computer software knowledge and expertise.

JOB DESCRIPTION

The key responsibilities of the Senior Emergency Response Planner will be as follows:

- Meet with clients to gather all pertinent ERP and safety related information.
- Provide the client with a detailed scope of work and quote.
- Write Corporate, Pipeline/Facility, and Drilling/Completions Emergency Response Plans.
- Coordinate the activities of Black Gold support staff and ensure communication between the many individuals in the different Black Gold departments.
- Manage client and /or resident concerns in a professional and timely manner.
- Liaise with appropriate Government agencies to coordinate ERP roles and responsibilities
- Complete ERCB, OGC and /or Saskatchewan ERP submissions.
- Prepare for, attend, and complete action items for weekly staff meetings.
- Participate in ERP training and full scale exercises.
- Help develop Public Awareness Programs.
- Maintain client stakeholder databases.
- Attend and help facilitate client Town Hall meetings.
- Update and track client Emergency Response Plans as required.

SKILLS / EXPERIENCE REQUIRED

- Should have extensive ERCB regulatory knowledge (familiar with D56, D60 and D71).
- Be familiar with OGC handbook and Saskatchewan ERP regulations
- Competent in the use of ERCB H2S Models and/or H2S release rate calculations and HVP flammability calculations.
- Familiar with GPS/GIS mapping interpretation and use.
- Have a solid working understanding of ICS.

In order to be successful, the Senior Emergency Response Planner must have excellent time management skills and possess strong problem solving ability. Previous management experience is required and a consulting business background is a definite asset.

Salary based on experience with yearly bonus, parking and benefits.
